ABOUT ME

AI Automation Expert with a passion for designing intelligent systems, AI agents, and workflow automations that drive efficiency, reduce costs, and empower businesses to scale.

I bridge the gap between AI innovation and real-world implementation to deliver measurable impact.

EXPERTISE

EXPERIENCE

AI Automation & Generative AI Developer

Freelance / Independent Consultant

- Design and build end-to-end AI-powered workflows and automations.
- Develop AI agents and assistants for business operations.
- Integrate APIs and third-party services to create seamless systems.
- Implement Generative AI solutions for content, data, and insights.
- Help businesses save time, reduce costs, and scale efficiently.

AI Automation & Agent Architect

Client Projects (Global)

- Architect scalable automation systems using n8n, Make & APIs.
- Develop custom AI agents using LangChain, LangGraph & LLMs.
- Build data pipelines for processing, analysis & automation.
- Deliver AI-driven solutions across marketing, sales, support, and operations.
- Ensure reliability, performance, and continuous optimization.

Generative AI Solutions Developer

Multiple Industries

- Built custom Generative AI applications for diverse use cases.
- Integrated LLMs (OpenAI, Claude, Gemini) into real-world apps.
- Developed RAG pipelines, chatbots, and AI content systems.
- Delivered secure, scalable, and cost-efficient AI solutions.

WHAT I DO

WORKFLOW
AUTOMATION

Automate repetitive tasks and complex workflows to boost productivity.

AI AGENTS &
ASSISTANTS

Build intelligent AI agents that understand, act, and deliver results.

API
INTEGRATION

Connect tools, APIs, and platforms to create powerful automations.

GENERATIVE AI
SOLUTIONS

Leverage LLMs to build smart content, chatbots, and AI-powered apps.

DATA
OPTIMIZATION

Process, analyze, and transform data into actionable insights.

CUSTOM AI
APPLICATIONS

End-to-end development of tailor-made AI solutions for your business.

TOOLS & TECHNOLOGIES

AUTOMATION &
ORCHESTRATION

n8n
