

DEEPAK HARWANI

AI AUTOMATION EXPERT

AI Automation Specialist | Generative AI Developer | Workflow Architect

Results-driven AI Automation Expert with 3+ years of experience designing and deploying intelligent agents, automating workflows, and building scalable AI-powered systems. I help businesses save time, reduce costs, and scale faster by leveraging the power of automation and modern AI technologies.

EXPERIENCE

2023
TO
2025

AI AUTOMATION & GENERATIVE AI DEVELOPER

Freelance | Remote

- Designed and automated 40+ end-to-end workflows using n8n, LangChain, and Make, reducing manual work by 80% (avg. 10+ hours/week saved per client).
- Built 15+ AI-powered applications using Python, LangChain, OpenAI API, and Vector Databases for tasks like content generation, chatbots, and data analysis.
- Integrated 30+ APIs and Webhooks to connect CRMs, databases, payment gateways, and third-party tools, enabling real-time data flow.
- Delivered AI solutions for 25+ clients across e-commerce, real estate, education, and SaaS industries, driving efficiency and measurable ROI.

2026
PRESENT

AI AUTOMATION & AGENT ARCHITECT

Freelance | Remote

- Architecting advanced AI agent systems using LangGraph, OpenAI Functions Calling, and Tool Calling for autonomous task execution.
- Developed and deployed 10+ custom AI agents that automate customer support, lead generation, data extraction, and report generation.
- Built internal automation frameworks that improved client operational efficiency by 70% and reduced process turnaround time by 60%.
- Continuously optimize AI workflows and models to ensure scalability, reliability, and cost-efficiency.

ABOUT ME

I design and build AI automation solutions and intelligent systems that help businesses save time, reduce costs, and scale faster. I specialize in workflow automation, AI agents, API integrations, and generative AI applications using modern tools and frameworks.

EXPERTISE

AI Workflow Automation

n8n, Make, Zapier, LangChain, LangGraph

AI Agents & Assistants

Autonomous agents, tool calling, memory & RAG, multi-agent systems

API Integrations

REST APIs, Webhooks, OpenAI API, third-party service integrations

Data Processing & Analysis

Data extraction, cleaning, transformation, and automated reporting

Generative AI Applications

Content generation, chatbots, RAG systems, AI-powered automations.

System Architecture

Scalable automation architecture, integration design, and performance optimization

WHAT I DO

AI Workflow Automation

Automate repetitive tasks and complex workflows using n8n, Make, Zapier.

AI Agents & Assistants

Build intelligent AI agents that think, act, and automate tasks.

API Integration & Dev

Connect APIs and third-party tools for seamless data flow and automation.

Generative AI Solutions

Create AI-powered content, chatbots, and intelligent applications.

Data Processing & Optimization

Clean, process, and optimize data for better insights and automation.

Custom AI Applications

Develop tailored AI apps using Streamlit, FastAPI, and modern frameworks.

TOOLS & TECHNOLOGIES

AUTOMATION & ORCHESTRATION

n8n Make LangChain LangGraph Zapier

AI & LLM

OpenAI Claude Gemini Hugging Face Pinecone

BACKEND & APIS

Python FastAPI REST APIs GraphQL Webhooks

DATA & STORAGE

PostgreSQL MongoDB Vector DBs Pandas Excel/CSV

DEVOPS & CLOUD

Docker Git GitHub Streamlit Render

LANGUAGES

Python JavaScript SQL HTML/CSS

“ I DON'T JUST AUTOMATE TASKS. I TRANSFORM BUSINESSES. ”
Saving time. Cutting costs. Driving growth with AI.
